About This Game

Zvezda is a 3D space combat simulation. It is inspired by games such as Wing Commander, Freespace, X-Wing...

You are a pilot of space fighter, a small but destructive space ship, fully armed with plasma guns and missiles. Your carrier, Zvezda is cut behind enemy lines and through ten missions, you and your team try to strike back at merciless enemy.

Missions consist of defending your carrier, flying reconnaissance missions and destroying enemy capital ships.

Typical mission starts with briefing, where you will learn about mission. Then you will take off from carrier and will then navigate (hyper jump) from waypoint to waypoint. At each way point, you are expected to clear enemy presence and defend our capital ships. Typically, you will fly with a group of wingmen.

Games is best to be played with a joystick, since game is quite demanding, at least at high difficulty. Joystick adds much fun into gameplay. It is strictly single player, with emphasis on flying and fighting and not on trading, building or strategy.

Game uses **AUTOCENTER** so it automatically tracks enemies - if you don't have a joystick, this is a must!

Game has just been upgraded:

- many bug fixes
- two fighters to choose from
- gameplay, fights
- added missiles
- improved campaign

Default keys:

- M- missile
- Left ctrl - guns
- J - jump
- C - communications
- T - target enemy
- F - target friendly
- W,S - throttle (or joystick throttle)
- Tab - turbo (or mouse wheel or joystick throttle)
- Arrow keys - rotate (or mouse or joystick)
- space - center on target

- 1) One more cutscene (two variants) for one missing death movie - fixed.
- 2) Videos volume was impossible to change - fixed, now same as voice volume.
- 3) When opening doors, controls are now disabled for about a second, without it, player could move too fast between areas and it caused some scripts to work incorrectly.

https://store.steampowered.com/app/704670/Inexplicable_Geeks_Dawn_of_Just_Us/

So, yeah, we don't really know what the future of announcements is gonna look like yet. We may keep the same format of just announcing a game on every page, but then when it releases we may..... not?

We don't know yet. It's going to get quite busy if we have ten games and announce on all their pages.. **Taking A Break To Beta Testing:**

Dear pilots;

We are taking a break to beta testing till latest version of the game is ready to be uploaded to steam.

We are hoping to update to SpaceBourne ver. 1.0 this week. After we upload ver 1.0 we will have a final Beta Week.

I thank you all Beta testers for your support and feedback so far. We are so close to big release!

See you at Space :))
